

Name: *Engr. Nafisa Kazi*

Address: 14 Green Park, Chittagong, Bangladesh

Phone: 018 884-46752

Email: nafisa.embedded@gmail.com

Objective

Detail-oriented **Embedded Systems Engineer** with expertise in microcontroller programming, sensor interfacing, and PCB design. Dedicated to developing efficient and reliable embedded IoT systems.

Summary of Qualifications

- B.Sc. in Electrical and Electronic Engineering, CUET
- 5+ years' experience in embedded firmware design
- Skilled in C/C++, Python, and assembly programming
- Hands-on experience with AVR, ARM Cortex, and ESP32

Education

B.Sc. in Electrical and Electronic Engineering — Chittagong University of Engineering & Technology — 2017

Technical Skills

- **Microcontrollers:** Arduino, PIC, STM32, ESP32
- **Programming:** C, C++, Assembly, Python
- **Tools:** Proteus, KiCad, Eagle, MPLAB
- **Communication:** UART, SPI, I²C, CAN
- **OS:** FreeRTOS, Embedded Linux

Experience

Embedded Systems Engineer | NextGen Automation (2018–Present)

- Designed firmware for industrial temperature controllers and IoT nodes.
- Developed low-power battery-optimized sensing units using ESP32.

Intern | Walton Hi-Tech Industries Ltd. (2017)

- Assisted in circuit debugging and microcontroller testing for smart appliances.

Projects

- **Microcontroller-Based Air Quality Monitoring System** using NodeMCU.

- **Smart Home Automation** using FreeRTOS and Wi-Fi modules.

Certifications

- Embedded Systems Design (NPTEL)
- Advanced PCB Design (Coursera)

Languages

- English, Bengali
